Walls + ceilings
Do not use on floors

Measure fan to ensure fit.
If fan is smaller than the opening of
Framed Exhaust Mount, use
plywood as an adapter to
increase flange size.

Fasten fan to **Exhaust Mount**.
Secure with screws.

Dry fit **body** into opening. Secure
corners to ceiling frame using
included screws. Add drywall
screws on bead as necessary.

Use mud to cover flange surface.
Wait to dry. Sand so surface
transitions smoothly. Repeat step
as needed.

Paint or wallpaper inside of **body +
plate** to match surrounding walls.
Do not paint fan.

Align tabs on **body + plate**, push to
snap into place.

That's it! Fittes to perfection.

Walls + ceilings
Do not use on floors

Mount **body** into opening. Fasten with screws as needed.

Measure fan to check if adjustments need to be made to the **Exhaust Mount** opening.

Measure **body**. If adjustment is needed, cut along perforated edges according to size in step 2.

Some fan flanges may obstruct holes needed to slide in the **plate** (step 9). If this is the case, trim fan flanges.

Stick provided **sound-dampening strips** along the edges of the opening.

Mount fan + fasten with screws. **Sound-dampening strips** should be sandwiched between fan and **body**.

Use mud to cover flange surfaces. Wait to dry. Sand and repeat as needed.

Paint or wallpaper inside of **body** + **plate** to match surrounding walls. Do not paint fan.

Insert and slide **plate** into place. Use hole on the side of the **plate** as a guide.

That's it! Fittes to perfection.
