B2	73mm
B3	22mm

Components

Two parts; a tray and a frame. Made from galvalume steel that has been powdercoated white for a durable long lasting finish. Both parts are fastened together by button head screws.

Corner bead edge to be fastened to surface and finished with drywall mud. Alternatively the vent can be flipped backwards to achieve a flushmount look with millwork, tile and stone. The tray can then be filled with the desired material to match the surrounding surfaces.
